

ROOM OCCUPANCY CONTROL SYSTEM

The Power of ExpoTools Is In Your Hands

ExpoTools Room Occupancy Control delivers total control at your event. Manage room occupancy, control access to paid events, track session credits, validate photo IDs, and track temperature check data, all from the **ExpoTools Room Occupancy Control Application**.

Mitigate risk factors by scanning traditional badge barcodes at entrances to sessions and events. Minimize queues at the entrance by instantly knowing several factors about the attendee with a quick go/no-go message: Did they sign up for the session? Did they get a temperature check? Are they the actual badge holder (photo ID on app)?

Devices at several entrances are synced to a central cloud-based database in real-time, for accurate room level display of capacity. At-Room Display Monitors can also be set up as a visual indicator of current room capacity to keep queues from forming for rooms at Max capacity.

Traditional session tracking and CPE accreditation data are collected as well. The data can be sent to third party APIs or can be directly interfaced for reports to all ExpoTools products such as ExpoLight, ExpoTools Lead Retrieval, BadgeMaster, and ExpoTools RFID solutions.

Contact tracing reports are also available to target at-risk individuals who may have been in contact with an infected individual. These reports are based on CDC guidelines for proximity and time spent in the same room.

ROOM OCCUPANCY CONTROL SYSTEM

ExpoTools Room Occupany Control App

Density & Occupancy Management to address new requirements for re-opening events.

- Quick scanning with our device or your own
- Use for session rooms, exhibit halls, keynotes, & receptions
- Provides room monitors with occupancy levels at the door
- Can be set to scan in/out, in only, or out only for designated entrances and exits
- Handles multiple doorways and entrances
- Optional photo ID confirmation of attendee
- Optional daily temperature screening and thermal management for confrontation-free enforcement
- Optional access control features for ticketing and reservations
- Integration with ExpoLight Conference App

ExpoTools Room Occupany Control Dashboard

A dashboard is provided for the organizer to quickly see the current occupancy levels of all rooms, or they can drill down to just one room as needed. The at-room-display intended for use at the entrance can be branded with event or sponsor information, and this can be per room or even per session, as required.

At-Room Display (entrance)

Tote Auditorium	1423 / 3000 (47.4%)	In Progress: None Upcoming: None				

Room Occupancy Dashboard (all rooms)

Contact tracing reports are available to help track down people that attended sessions alongside a person later found to be infected. These provide information as to who was most likely to have had the highest level of interaction with the infected person, allowing a more focused and targeted response to the situation.
